Directions (43-45): Read the passage given below and answer the given questions:
Four friends-Robin, Alex, Leo and Max—decided to embark on a picnic at a popular hill station. Upon their arrival, they discovered that due to the peak season, securing accommodation within the city was impossible. Fortunately, the weather was pleasant, which presented them with the alternative of camping outdoors. Equipped with $300 \mathrm{~m}^{2}$ of cloth, the group set about constructing their temporary abode in a local park.
They opted to fashion a conical tent. The design specifics of the tent included a height of 10 m and a diameter of 14 m . Once the structure of the tent was completed, they utilised the remaining cloth to cover the floor, ensuring a comfortable and dry living space during their stay.
